

Milestone 1

You should have all your user stories entered into the issue board on your GitLab repository. You may continue to use the board between the deadline and your tutor's assessment, but they will be looking at the dates issues were modified to make sure you did the work that was required of you prior to the deadline.

Stories Unambiguous and clear user stories with concrete acceptance criteria

Planning User stories have appropriate story point values and priorities

Epic story 1

As a player I am able to move around in the dungeon and get to an exit.

ID: US1

Name: Player movement

Description : As a player, I can move in the dungeon. So that I can go to any destination that I can go.

Acceptance Criteria:

1. Direction should be up, down, left, and right into adjacent squares
2. The player should perform the movement according to the command
3. The player should not be able to walk through a wall.

Story point: 1 points (1 point = 1 day)

Priority: High

ID: US2

Name: complete goals

Description: As a player, I should be able to complete the game only if I complete all the goals, so that the game has higher playability for me.

AC:

1. Goals including: Getting to an exit, destroying all enemies, having a boulder on all floor switches and collecting all treasure.
2. More complex goals can be built by logically composing basic goals such as AND and OR.
3. If getting to an exit is one of a conjunction of conditions, it must be done last.

Story point: 2

Priority: High

Epic Story 2.

As a player I should be able to interact with non-movable object in the environment.

ID: US 3

Name: Interact with door
